## SOFTWARE DEVELOPER

---

Highly motivated and detail oriented software developer with a passion for creating innovative and visually appealing websites. Solid understanding of Frontend technologies including HTML, CSS, and JavaScript. Proficient in JavaScript and experienced in utilizing Node.js frameworks such as Express.js. Skilled in developing RESTful APIs and integrating with databases such as MongoDB. I possess a strong problem-solving mindset, with the ability to debug and troubleshoot code efficiently. A collaborative team member with excellent communication skills, capable of working in an agile and fast paces environment. Eager to contribute my skills and learn from experienced developers to deliver high quality and robust web solutions.

## PROFESSIONAL EXPERIENCE

### Drip Kustom

February 2024 - May 2024

#### Fullstack Developer

Developed a bespoke e-commerce platform for Drip Kustom, a company specializing in custom shoe designs, employing HTML, CSS, JavaScript for frontend and Node.js, Express.js, and MongoDB for backend. Integrated secure payment options, ensuring seamless transactions for custom shoe purchases.

#### Accomplishments:

- Utilized HTML, CSS, and JavaScript for the frontend development to create a visually appealing and responsive user interface.
- Implemented backend functionalities using Node.js and Express framework to handle server-side logic and API endpoints.
- Integrated MongoDB database to store and manage product information, user data, and orders securely.
- Used Passport js for secure authentication.
- Integrated paystack and flutterwave payment gateway solutions to enable secure online transactions for purchasing custom shoes.
- Collaborated closely with the client to understand requirements, provide regular updates, and ensure the final product met their expectations.

### Oden Unlimited

January 2024 - April 2024

#### Backend

Collaborated with a team to develop Oden Lounge's restaurant website, leveraging Node.js, MongoDB, and CSS. Responsible for translating design concepts into responsive web elements, managing debugging processes, and implementing features such as page rendering and automated reservation confirmation emails.

#### Accomplishments:

- Successfully contributed to the creation of a fully functional restaurant website for Oden Lounge, enhancing the online presence and accessibility of the business.
- Ensured seamless user experience across various devices by implementing responsive design principles, optimizing usability for both desktop and mobile users.
- Implemented robust backend functionalities using Node.js and MongoDB, facilitating dynamic content management and efficient data handling for the website.
- Enhanced customer engagement and satisfaction by automating reservation confirmation emails, improving communication and streamlining the booking process for patrons.
- Collaborated effectively with team members, including designers and developers, to deliver high-quality results aligned with the company's objectives and design specifications.

#### Greysville Designs

May 2024 - Present

##### Fullstack developer

As a full-stack developer, spearheaded the creation of the online platform for Greysville Designs, utilizing HTML, Tailwind CSS, and JavaScript to craft a visually stunning and responsive frontend interface. Planned integration of e-commerce functionalities, enabling users to seamlessly purchase online courses from the fashion academy.

#### Accomplishments:

- Orchestrated the development of Greysville Designs' website, showcasing the company's fashion collections and brand identity with captivating frontend designs.
- Employed Tailwind CSS to efficiently style and structure the frontend elements, ensuring consistency and adherence to design standards across the platform.
- Leveraged JavaScript to implement interactive features and enhance user engagement, contributing to a dynamic and immersive browsing experience.
- Strategized the integration of e-commerce capabilities into the platform, laying the groundwork for future expansion and revenue generation through online course sales..

---

## EDUCATION AND CERTICATION

#### University of Ilorin

Bachelor of Engineering - Water Resources and Environmental Engineering

#### Web Development Bootcamp

##### Udemy

- Completed comprehensive web development training covering HTML, CSS, JavaScript, Node.js, and more.
- Developed proficiency in frontend and backend web development, including building responsive websites and web applications.
- Obtained certification upon successful completion of the course.
